

Steel Door Hot Press Machine

Features

- Timing control, it can be set according to the production process time, When time is up, pressure plate automatically rises.
- Intelligent temperature control, when the temperature is not enough, it will be heated automatically. When the temperature reaches the required value, the heating system will stop heating automatically
- The equipment is equipped with an emergency stop button and automatic stop protection switch of pressure plate over limit, which is convenient and safe.
- The electrical control system has protection for overload, short circuit, voltage loss, under voltage.

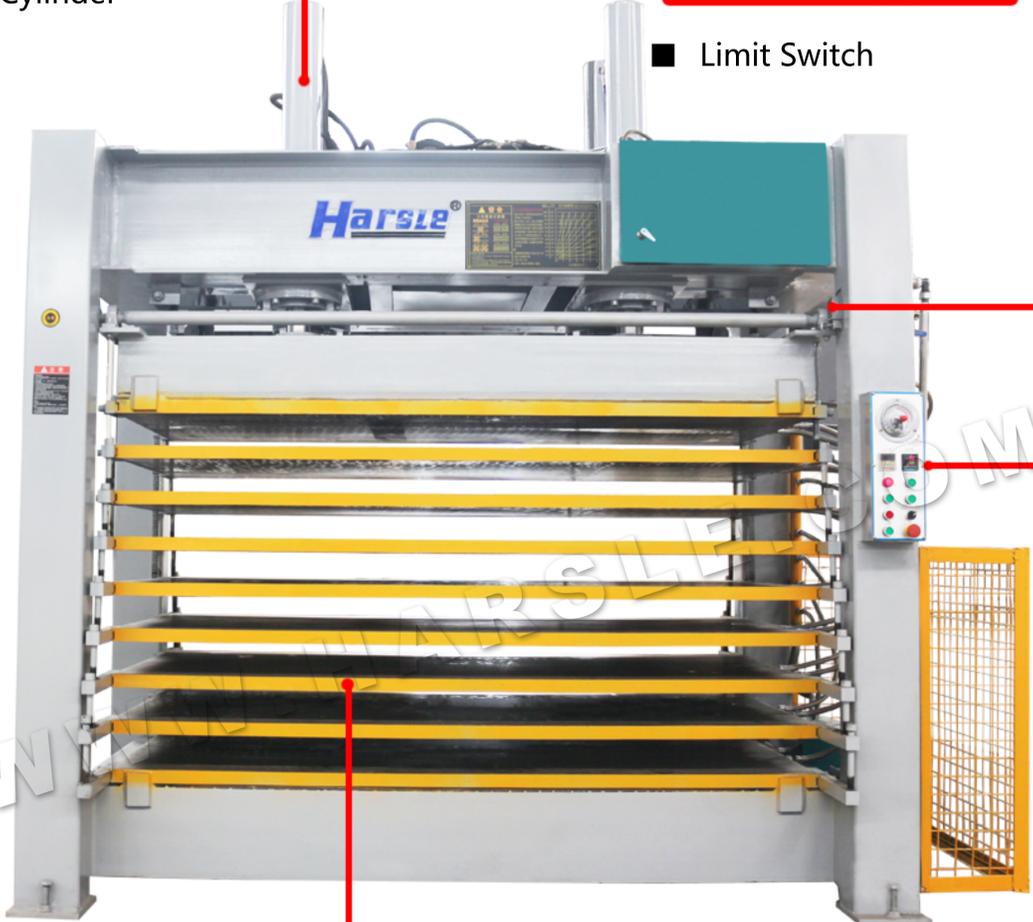

Details display

■ Cylinder

■ Limit Switch
